

Fernando Contreras

Assignment 5.2: Locate Largest and Smallest in 2D Arrays

June 26, 2026

Repository: <https://github.com/fernandojosecc/csd-402>

The screenshot shows an IDE with a project named 'csd-402'. The Explorer panel on the left shows the project structure with modules 1 through 5. The main editor displays the file 'J LocateLargestSmallest.java' with the following code:

```
14 public class LocateLargestSmallest {
102 public static void main(String[] args) {
131     {13, 67, 38, 99}
132 }
133
134 System.out.println(x: "=====");
135 System.out.println(x: " Int 2D Array:");
136 printArray(intArray);
137
138 int[] iLargest = locateLargest(intArray);
139 int[] iSmallest = locateSmallest(intArray);
```

The terminal at the bottom shows the execution of the program:

```
(base) fernandocontreras@Fernandos-MacBook-Pro ~ % cd /Users/fernandocontreras/Documents/Bellevue/csd/csd-402
(base) fernandocontreras@Fernandos-MacBook-Pro csd-402 % cd module-5
(base) fernandocontreras@Fernandos-MacBook-Pro module-5 % ls
LocateLargestSmallest.java
(base) fernandocontreras@Fernandos-MacBook-Pro module-5 % java LocateLargestSmallest.java
=====
Double 2D Array:
[ 3.5  7.2  1.1  ]
[ 9.8  2.4  6.6  ]
[ 4.0  8.3  5.5  ]
Largest Value: 9.8 --> Row 1, Col 0
Smallest Value: 1.1 --> Row 0, Col 2
=====
Int 2D Array:
[ 42  15  78  33  ]
[ 91  6  55  20  ]
[ 13  67  38  99  ]
Largest Value: 99 --> Row 2, Col 3
Smallest Value: 6 --> Row 1, Col 1
=====
```

At the bottom of the terminal, there is a prompt to commit changes to the repository and a status bar showing 'new /agent conversation'.
