

Fernando Contreras

Assignment 6.2: Fan Class

June 26, 2026

Repository: <https://github.com/fernandojosecc/csd-402>

The screenshot shows a code editor with the following Java code for the `Fan` class:

```
module-6 > J Fan.java > Fan > toString()
12 public class Fan {
76 // --- toString ---
77 @Override
78 public String toString() {
79     String speedLabel;
80     switch (speed) {
81         case SLOW: speedLabel = "Slow"; break;
82         case MEDIUM: speedLabel = "Medium"; break;
83         case FAST: speedLabel = "Fast"; break;
84         default: speedLabel = "Stopped"; break;
85     }
}
```

The terminal output shows the execution of the program:

```
(base) fernandocontreras@Fernandos-MacBook-Pro module-6 % javac *.java
(base) fernandocontreras@Fernandos-MacBook-Pro module-6 % java TestFan
=====
Fan 1 - Default Constructor
-----
Fan is OFF | Color: white | Radius: 6.0

After modifications:
Fan is ON | Speed: Medium | Radius: 8.0 | Color: blue
Speed value : 2
Is on?      : true
Radius     : 8.0
Color      : blue

=====
Fan 2 - Argument Constructor
-----
Fan is ON | Speed: Fast | Radius: 12.0 | Color: black

After turning off:
Fan is OFF | Color: black | Radius: 12.0
Speed value : 0
Is on?      : false
Radius     : 12.0
Color      : black
